# CSS Math functions

you should know

# Max()

The max function uses the largest value from the provided values.

```
.orangeDiv {  
    background-color: orange;  
    height: 100px;  
    width: max(60%, 300px);  
}
```

Picks the max value  
between 60% and  
300px

# Min()

The min function uses the smallest value from the provided values.

```
.yellowDiv {  
    background-color: orange;  
    height: 100px;  
    width: min(60%, 300px);  
}
```

Picks the smallest  
value between 60%  
and 300px

# Calc()

The calc function calculates the value to be used based on the provided values.

```
.indigoDiv {  
background-color: indigo;  
height: 100px;  
width: calc(60% - 200px);  
color: white;  
}
```

This is 60% - 200 px
